

Glencore is a leading privately held, diversified natural resources group with worldwide activities in mining, smelting, refining, processing, purchasing, selling and marketing of metals and minerals, energy products and agricultural products.

To complete our Service Center Team within the IT Department, we are looking for a committed personality as **Test Engineer**.

Your main tasks will involve automating test cases for our main business applications using HP Quality Center and QTP, document requirements to develop new test scenarios and test procedures, provide test consultancy to our application owners, run manual and automated test cases and follow up on the results. You will be the principal application owner for our HP Quality Center environment and also play a major role in developing our future QTP framework.

As a potential candidate, you dispose of:

- A professional background in Information Technology or related Engineering Sciences with a broad understanding of IT concepts and systems
- Experience in fast moving and complex multi-application environments well beyond Web GUI and happy flow testing
- Expert skills with HP Quick Test Pro and HP Quality Center
- Experience in SQL and VBScript preferred
- Very good communication skills in German and English are a must
- Experience in Accounting / Finance and / or Commodity Trading business domains would be a plus

Interested? Please send your application to:
